OR

Thanks Alex. Technically sharing raw ACLED data is against our terms of use, unless approved. However, as we know most academic articles using data require this kind of submission, and this is a small subset, this is permitted. So, we are happy to approve this use.

Thank you,

Olivia

Dear ACLED Admin,

One of my article has been recently accepted at the American Economic Review, and we are in the process of finalising the deposit of data for reproduction of the results.

To produce one graph, we are using an extract from ACLED for the province of Cabo Delgado (Mozambique) and for a very limited amount of time. We are talking about 45 observations. I am wondering whether we can obtain the authorization to distribute the extract in the data repository for the pure replication of the results in the paper. Or a clarification of whether this operation is not allowed. In line with the Terms, data have been correctly cited in the paper and in the readme for replication.

Kind regards

Alex
